

# EMMERRE<sup>srl</sup>

spare parts for trucks and trailers

2014  
IVECO

BRAKE PARTS MANUFACTURER

**TECHNO<sup>®</sup>**  
**BRAKE** by EMMERRE

Il Dipartimento di **Controllo Qualità** si occupa di verificare la conformità del prodotto durante tutte le fasi del processo, assicurandone la rispondenza alle specifiche di riferimento.

Il laboratorio qualità è dotato di strumenti di misura all'avanguardia che permettono di rilevare tolleranze previste con margini di errore fino al micron tramite la **TESA MICRO HITE 3D**.

The Department of **Quality Control** is engaged to verify the compliance of the product during all phases of the trial, ensuring product compliance with the requested specification.

Quality Laboratory includes advanced measuring instruments that allow to point out forecast tolerance with margin of error up to micron through **TESA MICRO HITE 3D**.

## CONTROLLO DI QUALITÀ

Отдел **контроля качества**, отвечает за проверку соответствия продукта, на всех этапах процесса производства, гарантируя, тем самым, соответствие техническим параметрам.

Лаборатория отдела контроля качества, оснащена самым передовым оборудованием, позволяющим проверять установленные допуски погрешностей, вплоть до микрон, с помощью **TESA MICRO HITE 3D**.

Il **Controllo Qualità** è dotato inoltre di un laboratorio attrezzato per tutto ciò che comprende il materiale d'attrito.

Le pastiglie freno e i ceppi freno vengono sottoposti alla prove di resistenza meccanica e del comportamento d'attrito previste dalla normativa ECE R90 come di seguito indicato:

- **Prova del comportamento d'attrito** in cui si valutano i valori del coefficiente d'attrito e dell'usura del materiale frenante, sottoposto ad una successione di cicli di frenatura con predefinite condizioni di temperatura, di pressione specifica e di velocità di strisciamento.

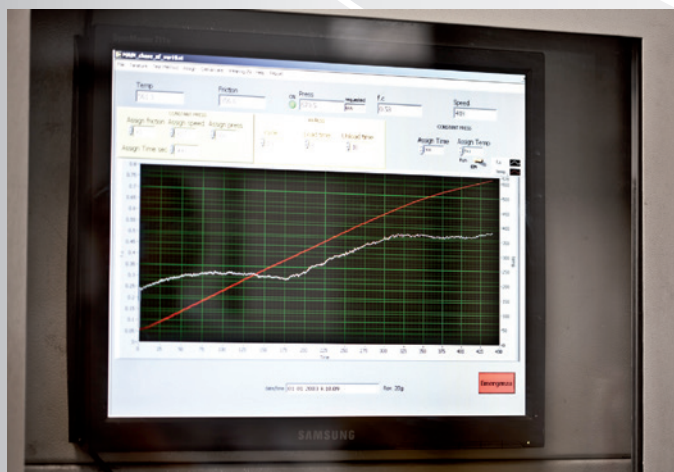

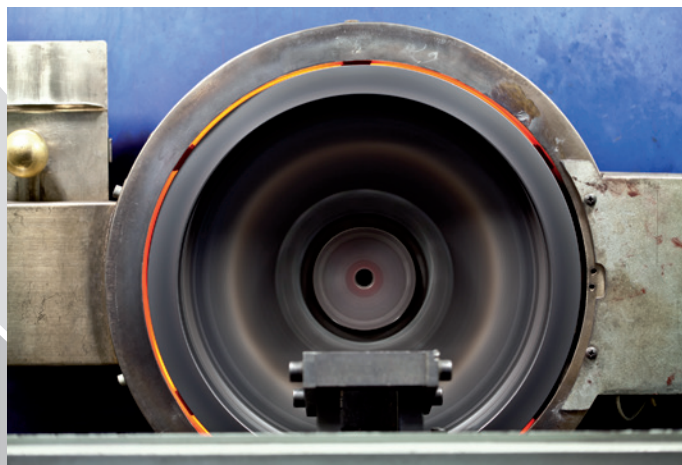

Furthermore, **Quality Laboratory** includes all machineries necessary to test friction materials.

Brake pads and brake linings are subject to friction and strength testing provided by the rules ECE R90. Test details here below:

- **Friction materials test** during which are evaluate the values of the friction coefficient and the value of the friction materials wearing, that is subject to a sequence of bracking's cycles with pre determined conditions of temperature, specific pressure and sleeding speed.

Kроме того, **Контроль качества** имеет лабораторию, оснащённую всем необходимым оборудованием, определяющим параметры фрикционных материалов. Тормозные накладки и колодки испытываются на коэффициент трения, в соответствии с нормативом ECE R90, а именно:

- **Испытания на коэффициент трения**, при которых измеряются значения КПД трения и износ фрикционных материалов, посредством циклов торможения, с заданными параметрами температуры, давления и скоростью вращения сопрягающихся деталей.

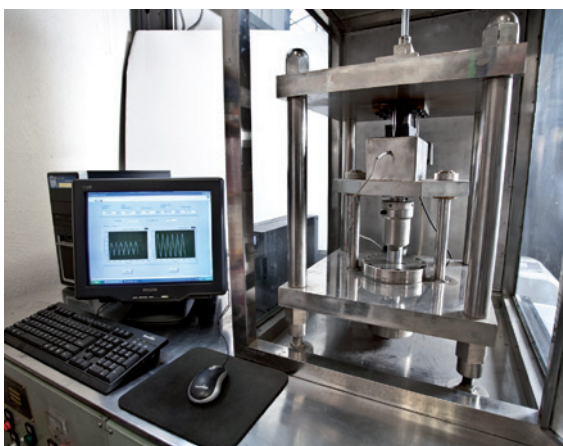

• **Prova di compressibilità** con cui si valuta la deformazione del materiale frenante sottoposto ad una pressione specifica predeterminata. Il valore rilevato non deve essere superiore al 2% dello spessore iniziale per le prove a temperature ambiente, mentre non deve essere superiore al 5% dello spessore iniziale per le prove effettuate a 400°C.

Il dipartimento si occupa inoltre della gestione delle comunicazioni di carattere qualitativo dei Clienti, fornendo prontamente risposte e soluzioni ad ogni segnalazione.

• **Compressoion test** during which is evaluate the deformation of braking materials subject to a pre determined specific pressure. The value noted must not exceed 2% of the initial thickness during tests at room temperature and do not exceed 5% of the initial thickness during tests at 400°C.

The department takes care of management customers' quality communications, providing promptly answers and solutions.

• **Проверка геометрических параметров**, при которой определяется деформация фрикционного материала, при заданных параметрах давления. Полученное значение толщины материала не должно превышать 2% от первоначального значения, при нормальной температуре окружающей среды и не более 5% при температуре 400°C.

Отдел, также поддерживает прямые контакты с клиентами, по вопросам качества, немедленно отвечая на вопросы и предлагая конструктивные решения любой проблемы.

• **Prova di resistenza al distacco** con cui si valuta la forza da applicare alla pastiglia per staccarne la parte frenante dal relativo supporto metallico. Il valore rilevato, diviso per la superficie frenante, indica il carico di distacco specifico che deve essere uguale o superiore a 250N/cm<sup>2</sup>.

• **Strength test** during which is evaluate the strenght to be applied to the brake pads to remove the friction materials from the metallic part. The measured value, divided by the breaking surface, indicates the load detachment specific which must be equal or higher than 250N/cm<sup>2</sup>.

• **Испытание на усилие отрыва**, в котором определяется усилие отрыва тормозной накладки от колодки. Полученное значение, делённое на площадь поверхности, должна быть равной или выше 250N/cm<sup>2</sup>.

**Quality control.**  
Advanced instruments.

I laboratori di **Ricerca & Sviluppo** di Emmerre rappresentano il cuore pulsante dell'innovazione promossa dall'Azienda.

Grazie ad un team di esperti professionisti nel settore del «materiale frenante» e di strumentazione ed apparecchiature all'avanguardia è possibile effettuare in tempi brevi analisi e valutazioni relative a:

- Sviluppo di nuovi prodotti, miglioramento delle performances, contenimento dei costi di produzione (indirizzi formulativi e ricerca delle materie prime adeguate, prove preliminari in laboratorio e analisi di campioni per indirizzare la ricerca, prove industriali e controllo analitico del prodotto finito, approvazione finale del prodotto, gestione delle procedure di **Omologazione** del prodotto).
- Controlli periodici della produzione attraverso prove distruttive a fatica.
- Assistenza tecnica ai clienti attraverso l'analisi dei problemi, ricerca delle cause, individuazione delle azioni di miglioramento.

Emmerre's **Research and Development** laboratories represent the beating heart of the innovation promoted by the company.

Thanks to its team of experienced professional people in the «friction material» field and to its advanced instruments, it's possible to make in short time analysis and evaluations relevant to:

- New products' development, improvement of the performances, production cost containment (new formula and effective raw materials research, laboratory's preliminary tests and samples' analyses in order to start the research, industrial tests and analytical verification of the finished product, final approval of the product, management of the finished product's approval procedures)
- Production regular checks through stress destructive tests
- Technical support to the customers through analyses of the problems, causes research, identification of the improvement actions.

Лаборатории **исследований и развития** Emmerre, являются центром инноваций, предлагаемых компанией.

Благодаря команде опытных профессионалов в области «фрикционных материалов», измерительных приборов и современного оборудования, можно в кратчайший срок произвести:

- Разработку новых продуктов, улучшение качества, снижение затрат на производство (качественный состав и поиск соответствующего сырья, проведение предварительных испытаний образцов в лаборатории, для определения направления исследований, опытно-промышленные испытания и аналитический контроль готовой продукции, окончательные испытания готовой продукции, утверждение процедуры Омологации продукта).
- Периодические проверки производимой продукции, путём нагрузок и разрушения.
- Техническая помощь клиентам, путём анализа проблем, исследования причин, определение комплекса мероприятий по усовершенствованию.

**Research & Development.** The heart of innovation.

Emmerre realizza presso i suoi stabilimenti operazioni di marcatura laser di precisione ed accurati assemblaggi dei principali prodotti in particolare relativi alla linea «frenante».

Le lavorazioni vengono eseguite da tecnici esperti con l'ausilio di moderni macchinari che, completando le fasi di realizzazione del prodotto finito, consentono di verificarne l'idoneità all'uso.

Emmerre carries out in its premises laser precise marking operations and accurate assembly of the main products, in particular relevant to the «brake system».

The processing is made by experienced technician using up-to-date equipment that, completing the phases of realization of the finished product, allow to verify the suitability for use.

Emmerre производит на своих предприятиях лазерную маркировку особой точности и сборку важных изделий, в особенности, это касается линейки деталей тормозной системы.

Сборку деталей и узлов осуществляют техники – эксперты, на современном оборудовании, позволяющем производить их окончательную проверку.

**Packing & Marking.**  
Service and traceability.

La gestione **Logistica**, grazie all'elevato grado di informatizzazione ed automazione, è il punto di eccellenza di Emmerre.

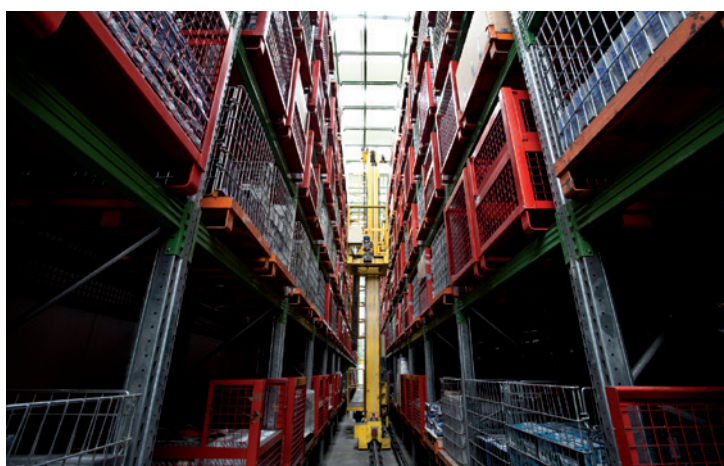

I moderni sistemi informatici di acquisizione e di processo degli ordini consentono di dare al Cliente un servizio dinamico e flessibile.

I materiali vengono immagazzinati, movimentati, imballati e spediti utilizzando impianti automatici che assicurano tempestività, sicurezza e precisione.

L'impiego di magazzini automatici robotizzati elimina gli errori riducendo i tempi di attraversamento.

L'ausilio di sistemi di movimentazione dei carichi pesanti e l'utilizzo di impianti automatici di imballaggio garantiscono la salvaguardia del prodotto.

La piattaforma di **E-Commerce** integra e completa gli strumenti di interfaccia e di gestione

The **Logistic**, thanks to a high level of computerization and automation, is the main Emmerre's core.

The modern computer system of orders' acquisition and process, allow to give to the customer a dynamic and flexible service.

Goods are stowed, handled, packed and dispatched using automated plants, that assure timeliness, security and precision.

Use of automated warehouses reduces the mistakes and the setup times.

Help of handling systems for heavy loads and the use of package automated systems, grant the products' preservation.

The **E-Commerce** platform integrates and completes the interface and management instruments.

**Логистическое** управление, полностью автоматизировано, является предметом гордости Emmerre.

Современные компьютерные системы и программы, позволяют получать и обрабатывать заказы, обеспечивая клиента, динамичным и гибким сервисом.

Материалы хранятся, обрабатываются, упаковываются и отправляются, с помощью автоматических систем, обеспечивающих своевременность, безопасность и точность.

Использование автоматизированных роботов на складах, исключает ошибки и сокращает сроки выполнения заказа.

Использование систем для обработки тяжелых грузов и их автоматической упаковки, обеспечивает сохранности продукта.

Платформа **электронной коммерции** дополняется функциями управления интерфейсом.

**Logistics.** Excellence's point.
